

HONEYBEE ACCOUNTING

**KNOW YOUR MONEY
AT ALL TIMES.**

BRAND KIT V3.0

Live Site Standard

Approved direction | Kody Rogers | August 21, 2026

GOVERNING REFERENCE The published myhbcfo.com implementation is the source of truth for future Honeybee Accounting brand work.

This standard supersedes Rose + Slate and the earlier typography specification. Legacy materials remain historical records only.

01 | BRAND PLATFORM

Clarity before decoration.

Honeybee turns organized financial information into a clearer view of what stands, what needs attention, and what decision comes next.

Know your money at all times.

POSITIONING A clearer financial view for the decisions an owner-led business needs to make next.	AUDIENCE Owner-led businesses ready to move past DIY bookkeeping, generally under \$2 million in annual revenue.
REGION Southern Utah, Mesquite, Nevada, and Littlefield, Arizona.	CHARACTER Direct, calm, assured, practical, human, owner-centered, and honest about limits.

The Honeybee method

01 ORGANIZE Keep the record dependable and ready for review.	02 UNDERSTAND Put context around the position so the owner can see what it means.
03 DECIDE Turn open questions into practical next-step options that preserve owner judgment.	04 KEEP VISIBLE Name scope, requests, review stages, responsibility, and the next action.

PRIMARY PROMISE Useful financial information should help the owner move, not leave them sorting through records, inboxes, and unanswered questions.

02 | IDENTITY

The hexagonal bee is the signature.

The detailed bee-and-honeycomb artwork is a locked identity asset. Use the supplied files. Do not redraw, simplify, recolor, crop, or stretch it.

Primary full-color lockup | Light and warm-paper surfaces

Primary inverse lockup | Soft-black and deep-black surfaces

Symbol-only mark

Profile and app mark

Digital size and clear space

USE	IMPLEMENTED SIZE	RULE
Header lockup	78 x 62 px	Preferred desktop size
Mobile lockup	66 x 52 px	60 x 48 px is the extra-small limit
Footer lockup	96 x 76 px	Preferred signature size
Profile mark	64 / 180 / 512 px	Preserve the full square canvas
Clear space	At least 16 px on web	Keep roughly one-quarter of the rendered logo-box height clear

A print minimum is not established by the website. Proof the logo at final output size before release.

03 | COLOR

Soft black leads. Honey signals the decision.

Warm paper gives the system humanity. Sage organizes. Honey gold is used as punctuation, action, and signal rather than wallpaper.

Soft Black #111310 Primary dark canvas and light-surface ink	Deep Black #0B0C0A Header, footer, and deepest field
Warm Paper #F3F2EA Primary light surface and inverse text	Warm Canvas #E7E6DD Light-page background behind paper surfaces
Honey Gold #E8C655 Signature action, selected state, and bee signal	Soft Honey #F2DA82 Hover, callout, and quiet gold surface
Sage #A6ADA0 Structure, inactive context, and dark secondary text	Soft Moss #D7D9CF Quiet tertiary support
Honey Ink #684F00 Accessible gold-related text and focus on light	Muted Copy #5B5E55 Secondary copy on warm light surfaces

Color balance

- Let Soft Black carry the emotional field and Warm Paper carry explanation.
- Use Honey Gold for the selected choice, primary action, or one decisive signal.
- Use Sage and Soft Moss for structure and quiet support, never as the main event.

DISTRIBUTION Black leads. Paper explains. Honey decides. Sage organizes.

03 | COLOR ACCESSIBILITY

Contrast is part of the palette.

The combinations below are the approved working pairs from the live interface. Preserve them across web, documents, social graphics, presentations, and product surfaces.

Approved contrast pairings

PAIRING	RATIO	USE
Warm Paper on Soft Black	16.63:1	Primary inverse text
Honey Gold on Soft Black	11.24:1	Display accent and dark-surface labels
Soft Black on Warm Canvas	14.91:1	Primary light-surface text
Honey Ink on Warm Paper	6.91:1	Links, labels, and focus
Functional Slate on Warm Paper	5.69:1	Guidance and policy copy
Soft Black on Honey Gold	11.24:1	CTA and selected-state text

NEVER Do not place Warm Paper, white, Sage, Moss, Soft Honey, or Honey Gold as small text on a Honey Gold or light-paper surface. Use Soft Black or Honey Ink.

Functional UI colors

ERROR #9D3E25 Validation and failure states only	SUCCESS #365B2B Completion and confirmed states only
--	--

Error and Success support comprehension. They are not campaign colors, decorative accents, or replacements for Honey Gold.

04 | TYPOGRAPHY

One family. Wide range. Clear hierarchy.

Manrope is the sole active brand family. It carries display, body, navigation, controls, forms, and HIVE. Use the self-hosted variable font from the website whenever the channel supports it.

See what matters. Decide what comes next.

ROLE	DIGITAL SPECIFICATION	USE
Flagship hero	64-96 px 700 1.05 -0.03em	One strong promise
Flagship section	52-96 px 700 1.07 -0.03em	Narrative section turns
Supporting H1	48-72 px 600 1.08 -0.025em	Interior public pages
H3	18-30 px 600-700 1.12 -0.02em	Cards and grouped detail
Body	16 px 400-500 1.65	Default reading text
Narrative body	16-17 px 400-500 1.70	Long-form supporting copy
Eyebrow	12 px 700 1.40 +0.20em	Uppercase label only
Nav and action	14 px 700	Links, buttons, and menu items
Legal and disclosure	14 px 400-600 1.65	Boundaries and reassurance

Weight discipline

- 500 for field and input text.
- 600 for supporting-page display and calm hierarchy.
- 700 for flagship display, navigation, and primary actions.
- 800 only for short labels and status text. Do not use 900 as a brand standard.

FALLBACK Use Segoe UI, then Arial, then a neutral sans serif only when Manrope cannot be loaded. Preserve the hierarchy and spacing even when the typeface changes.

05 | LAYOUT

High-contrast editorial, not a card template.

The system uses large confident type, generous space, flat planes, and a strong left edge. Each section should deliver one clear read before the next section begins.

FLAGSHIP SHELL min(1380px, 100vw - 64px), centered	PUBLIC GUTTER clamp(20px, 3vw, 52px); 22px on mobile
SECTION RHYTHM 80-112px vertical; 76px on mobile	COPY MEASURE 62-68 characters for sustained prose
NARRATIVE RADIUS 16px	ACTION RADIUS 999px pill
BORDER 1px Sage or a restrained translucent rule	SHADOW Reserved for lifted paper or HIVE, never every card

Composition rules

- Dark planes carry the emotional story. Warm Paper and Warm Canvas carry explanation, forms, and product detail.
- Honey Gold marks the important choice, active state, or next action. It does not fill every section.
- Use asymmetry and negative space. Avoid centered stacks unless a confirmation or receipt benefits from them.
- Keep primary copy left aligned and reserve wide two-column layouts for a clear message-plus-context relationship.
- Do not repeat a generic hero, three-card grid, testimonial band, and CTA pattern across every asset.

05 | RESPONSIVE LAYOUT

The hierarchy survives every width.

Responsive behavior simplifies the composition without shrinking the promise, hiding the next action, or weakening the Honeybee identity.

Responsive behavior

BREAKPOINT	SYSTEM RESPONSE
1320 px	Desktop navigation and header CTA collapse into the full-width mobile menu.
1080 px	Major two-column story grids stack and HIVE content simplifies.
760 / 720 px	Header becomes 74 px, gutters tighten, primary grids stack, and footer becomes vertical.
620 px	Forms become single-column and submit actions become full width.
380 px	Shared gutter becomes 16 px and the logo uses its 60 x 48 px minimum.

Mobile decisions

NAVIGATION One full-width menu with the primary action preserved	STORY Stack message before context and keep the reading order obvious
FORMS Single column, full-width submit action, 44px minimum targets	IDENTITY Use the approved compact lockup without cropping or redrawing

TEST Review at 1320, 1080, 760, 620, and 380 px, plus keyboard focus and reduced-motion states.

06 | COMPONENTS

Actions feel confident. Surfaces stay calm.

The component system favors clear foreground-background relationships, accessible focus, practical labels, and restrained elevation.

PRIMARY ON DARK Honey Gold fill, Soft Black text, 54px minimum height, pill radius	PRIMARY ON LIGHT Soft Black fill, Warm Paper text, 48-54px minimum height
COMPACT ACTION 44px minimum height for headers and utility controls	TEXT LINK Underlined, 1px line, about 0.3em offset, specific verb-led label
LIGHT CARD Warm Paper on Warm Canvas with a Sage rule	DARK CARD Soft Black or Raised Ink with translucent rules and no default shadow
HONEY CALLOUT Honey fill, Soft Black text, generous padding, dark inverse button	HIVE CONSOLE Warm Canvas frame, Warm Paper content, Ink title bar, 16px radius

Action hierarchy

CONVERSION Start an assessment the primary public next step	INQUIRY Send my inquiry a specific submission outcome
PRODUCT Explore the controlled HIVE pilot boundary stays visible	UTILITY Secure upload operational action, never promotional copy

HIERARCHY Give each composition one unmistakable primary action. Keep every secondary action visibly quieter.

06 | FORMS AND STATES

Confidence continues through the input.

Forms should feel direct, calm, and visibly responsive. Labels remain explicit, targets remain generous, and every state is understandable without color alone.

Forms

Element	Specification
Label	13 px / 700; required marker in Honey Ink
Input	16 px / 1.45 / 500; 13 x 14 px padding; square corners
Surface	Warm Paper with a 1 px Sage border and Soft Black text
Focus	Honey border and halo plus a visible 3 px Honey Ink outline
Textarea	100-112 px minimum and vertical resize
Checkbox	17 x 17 px with Honey accent
Target size	44 px minimum; 48-54 px preferred for primary controls

Focus and state

- Dark surface: 3 px Soft Honey outline with 4 px offset.
- Light surface: 3 px Honey Ink outline. Honey surface: Soft Black focus.
- Error and success colors are functional UI colors, not promotional brand colors.

ACTION LANGUAGE Use specific labels such as Start an assessment, Start here, Send my inquiry, Explore the controlled HIVE pilot, and Secure upload. Avoid generic Learn more labels.

07 | MOTION

Ambient, restrained, and purposeful.

Motion supports confidence and direction. It never carries essential information, blocks an action, or competes with the financial message.

BEHAVIOR	TIMING	RULE
Hero entry	750 ms	Rise 18 px and fade once with a soft ease-out
CTA hover	180-200 ms	Lift no more than 2 px
Control press	160 ms	Scale to 0.97 for tactile feedback
Interface change	About 180 ms	Keep state changes quick and legible
Bee-to-HIVE paths	7.6-9.2 s	Slow offset paths out from and back to the center
HIVE tabs	Visitor controlled	Never auto-cycle

Hero video standard

- Decorative background only. The message must remain complete without it.
- First 30 seconds, muted autoplay, seamless loop, privacy-enhanced YouTube player.
- No native player controls or captions. Provide a visible Honeybee play-pause control.
- Use the local poster as the fallback and preserve strong text contrast with the dark shade layer.

Reduced motion

- Do not automatically load or play the video. Keep the poster visible unless the visitor chooses play.
- Stop bee paths, entry motion, smooth scrolling, hover movement, and nonessential transitions.
- Keep every label, instruction, state, and action fully available without animation.

SOURCE BOUNDARY The unused HomeStoryMotion component is not part of this standard. The live motion authority is HeroVideo, HomeHivePreview, and the active homepage styles.

08 | IMAGERY

Cinematic financial metaphors with room to think.

Imagery should feel tactile, quiet, and deliberate. The visual world is black, gold, paper, structure, light, and motion rather than generic office stock photography.

Hero poster direction | Sculptural records, paper movement, dark negative space

USE

- Dark negative space for decisive copy
- Warm directional light and gold structure
- Paper, records, ledgers, paths, and systems as metaphors
- Cinematic texture with a calm focal point
- Abstract hexagonal detail used sparingly

AVOID

- Generic smiling office teams and staged desk stock
- Cute bee cartoons outside the locked identity
- Honeycomb wallpaper or decorative clutter
- Bright yellow fields that overpower the message
- Imagery that implies a guaranteed financial outcome

08 | SOCIAL IDENTITY

The promise stays readable at a glance.

Social artwork carries the same cinematic field, locked identity, and decisive message as the live site. Decorative detail supports the promise rather than competing with it.

Approved social card

Approved social card source | 1200 x 630 px | Use the active optimized JPG

CANVAS 1200 x 630 px master; preserve the full landscape ratio	SAFE MESSAGE ZONE Keep the identity and promise together on the left
CROP PRIORITY Protect the logo and promise; trim ornamental detail first	CONTRAST Soft Black field, Warm Paper message, Honey Gold signal

DO NOT Replace the locked logo, add promotional badges, crowd the message, or place small light text over Honey Gold.

09 | VOICE

Write to the owner who has to decide.

Lead with the pressure, question, position, or next move. Then explain the accounting support in plain language.

DIRECT Name the point without throat-clearing.	CALM Reduce pressure without minimizing the issue.
ASSURED State what Honeybee does without pretending certainty.	PRACTICAL Use records, questions, attention, responsibility, and next step.
HUMAN Sound like a capable partner, not a software brochure.	BOUNDED Keep scope, ownership, and professional limits visible.

Preferred language

- "See what matters. Decide what comes next."
- "Know who owns the next move."
- "What should be working better?"
- "Bring us the question before it becomes a problem."
- "Your books, handled by a real team."
- "Leave the email archaeology behind."

Avoid

- Cute bee puns, exaggerated sweetness, and novelty language.
- Corporate jargon such as end-to-end transformation, best-in-class visibility, or solution ecosystem.
- Absolute promises about savings, profitability, financing, tax results, or business performance.
- Generic labels such as Learn more when a clear verb-led action is available.

FINANCIAL CLARITY ASSESSMENT A no-charge informational review with written observations, visible information gaps, and prioritized options for what to address next. It does not create a client relationship or authorize work.

10 | HIVE

The clarity workspace belongs to Honeybee.

HIVE uses the same black, paper, honey, sage, and Manrope system, then becomes denser and more task-focused. It remains secondary to the real bookkeeping and financial-management relationship.

POSITION Bring the records and review context into one view.	REQUESTS Collect what is needed with visible ownership and status.	DECISIONS Name the open choice and what happens next.
RECORDS Organized for review, not treated as a second ledger.	OPEN QUESTIONS Collected instead of scattered across conversations.	NEXT STEP Visible before work moves.

Naming and relationship

- Use HIVE when the product stands alone or appears as a product label.
- Use Honeybee Hive on the first natural-language reference.
- QuickBooks Online or the approved accounting platform remains the ledger. HIVE does not edit the books.
- Honeybee adds judgment, review, context, and named responsibility around the organized view.

Current public boundary

CONTROLLED DEMONSTRATION Until separately approved, describe HIVE as a controlled demonstration using simulated data. Do not claim live client sign-in, connected financial data, automation, integration, or production readiness.

Visual restraint

- Use honeycomb outlines, small signal dots, short status pills, and contained product grids as functional details.
- Keep the Honeybee identity visible without turning the interface into a branded wallpaper.
- Preserve 44 px minimum targets, explicit focus, real labels, and static reduced-motion states.

11 | GOVERNANCE

The live site is now the source of truth.

Use this order whenever a new Honeybee asset is created, revised, or approved.

PRIORITY	SOURCE	RULE
1	Current direction from Kody or Stacie	Controls the exact asset, campaign, or release.
2	Published myhbcfo.com implementation	Governs visual language, typography, components, motion, and public voice.
3	Brand Kit v3.0	Translates the live system for other channels.
4	Approved current logo files	Preserve the locked bee-and-honeycomb artwork.
5	Channel implementation	Adapt responsibly without changing identity, truth, or access controls.
Legacy	Rose + Slate and connected-ledger materials	Historical use only. Do not use for new core-brand work.

Canonical asset register

ASSET	USE
primary-full-color.png	Master full-color lockup for light surfaces
primary-inverse.png	Master inverse lockup for dark surfaces
primary-full-color-192.png	Active optimized web lockup for light headers and footers
primary-inverse-192.png	Active optimized web lockup for dark headers and footers
mark-full-color.png	Full-color symbol without the name
profile-mark-512 / 180 / 64.png	Profile, touch, and browser marks
favicon.ico	Browser icon
og.jpg	1200 x 630 social image
hero-clarity.webp	Active homepage poster
manrope-latin-variable.woff2	Active self-hosted brand typeface

11 | RELEASE CONTROLS

Protect the truth at the final mile.

Every public asset must preserve the approved identity, claim boundaries, accessibility, destination, and approval authority before it is released.

Release controls

- Honeybee is one word in all current public brand references.
- Do not describe Honeybee as a CPA firm or law firm, or offer audit, review, compilation, attest, assurance, legal, investment, payroll-processing, or tax-return preparation services.
- Do not promise tax savings, profitability, financing, performance, or another outcome.
- Keep client records, financial values, credentials, and restricted information out of reusable brand assets.
- Kody or Stacie approves the exact public version and destination before release.

Preflight checklist

IDENTITY Approved logo file, clear space, and correct surface variant	MESSAGE Specific owner-centered promise with no unsupported outcome claim
ACCESS Readable contrast, keyboard focus, alt text, and reduced motion	RELEASE Correct URL, audience, privacy boundary, and named approval

STATUS Approved direction. Effective August 21, 2026. Governing visual reference: the published Honeybee Accounting website at myhbcfo.com.

Version record

FIELD	CURRENT STANDARD
Version	3.0 Live Site Standard
Effective	August 21, 2026
Approval	Kody Rogers
Governing URL	myhbcfo.com
Review trigger	A material change to the published visual system, public scope, or claim boundaries
